INDUSTRIAL STUDY URAL'SK, USSR

Positive identification of the industrial facilities of Ural'sk was prevented by the poor quality of [REDACTED] photography. The available photo coverage was limited to the northern sector of the town and was dated [REDACTED]

25X1D

25X1D

The enclosed annotated map was designed to give more positive location to terrain and cultural features than that provided by current maps. Relocation of the railroad and facilities was of primary concern.

The numbered facilities listed below correspond to the annotations on the map:

1. Ceramics Plant

A compact group of buildings occupy an area 840' x 600' at its widest point. Eighteen rectangular buildings, 15 feet wide, vary in length from 125 to 300 feet. Other facilities include a furnace house, [REDACTED] with smokestack, and a smaller building with a conveyor to the adjoining stockpile area.

25X1D

2. Fuel Storage Area

There are nine small tanks, [REDACTED] feet in diameter, enclosed by a fence. These are situated in a larger walled area, approximately 670' x 385', with several small buildings. The area is served by a rail spur.

25X1D

3. Fuel Storage

There is one fuel storage tank, approximately [REDACTED] in diameter, and three small buildings enclosed by a fence.

4. Storage and Assembly Area

This is an open storage area enclosed by a fence or wall, approximately 540' x 150'. One small warehouse type structure is found within the enclosure. There is a probable light assembly site adjacent to the storage area. Five buildings are enclosed in a rectangular area [REDACTED]

5. Probable Light Manufacturing

A small enclosed industrial site, [REDACTED] has a boiler house connected by pipes or conveyors to two adjacent buildings. There are four other buildings within the compound. The compound does not appear to be served by a rail spur although it is situated close to rail sidings. A power plant had been reported in this area.

6. Storage Area

Small fenced enclosures adjoin the marshalling yard. A number of small buildings are within each area. These are probably used for storage.

7. Light Industry

The available photography covers only a portion of the installation. Seventeen rectangular buildings are visible. Three of these buildings measure [REDACTED] and 14 buildings are 15 feet wide and from 115 to 300 feet long. The installation is quite similar to the nearby ceramics plant.

8. Construction Area

A probable barracks area was under construction here. One building, [REDACTED] and about 30 smaller buildings, were in the

area. Foundations appear to be laid for 30 or 40 additional small buildings.

9. Light Industry

25X1D An area 660' x 500' is enclosed by a fence. Several other fenced areas are within the installation. A boiler house, 90' x [REDACTED] is connected by pipes to three nearby buildings. The build- 25X1D ings measure [REDACTED] There are also 12 smaller buildings of various sizes. The area is served by a rail spur.

10. Unidentified Industry

This probable light industry consists of several fenced enclosures, a few warehouse type structures, and many small buildings. The area may be a part of the facilities at Number 9.

11. Water Tower

12. Fuel Storage Area

There are 11 fuel storage tanks, each approximately [REDACTED] 25X1D feet in diameter, in an area served by four rail spurs. Three warehouse type structures, two of them [REDACTED] and one [REDACTED] 25X1D are located near the rail spurs. 25X1D

13. Construction Area

25X1D Four structures, [REDACTED] were under construction. These may be designed for some type of manufacturing or possibly for railroad rolling stock repair.

14. Walled Compound

This area may be a prison or military headquarters. Numerous small buildings are found nearby.

15. Unidentified Installation

This is a walled compound 230 feet square. It may possibly furnish some type of power or fuel for the installation at number 16.

16. Unidentified Industry

The area is located approximately five miles east of Ural'sk. It is served by a rail spur running from the main line at Ural'sk. It is also 1,200 feet west of a navigable portion of the Ural River. A fence or wall encloses the main facilities which cover an area of approximately 665,000 square feet.

25X1D A boiler house, [REDACTED] has a high, rounded roof along one side. A steam pipe or conveyor connects the boiler house to a multi-storied structure, [REDACTED] 25X1D A special structure, 35 feet wide, projects 65 feet from this building. A similar structure is found on a smaller building in the complex. A building, 120' x 30', and 7 smaller structures comprise the remainder of the facilities within the walled area. Cooling basins or water purification beds, 440' x 180', are found along the northwestern perimeter of the plant area. Workers' quarters and administrative buildings are nearby.

17. Probable Storage Area

Two warehouse type buildings, [REDACTED] 25X1D are located 200 feet from the Ural River in an area partially enclosed by a wall.

Railroad facilities consist of two marshalling yards. The larger yard is approximately 2,500 feet long and 9 tracks wide. Service facilities are located at the western end and include a

25X1D probable car repair shop, [REDACTED] and three smaller shops.

A roundhouse is located in the area but with no apparent track activity. A through type station serves the town. Toward the

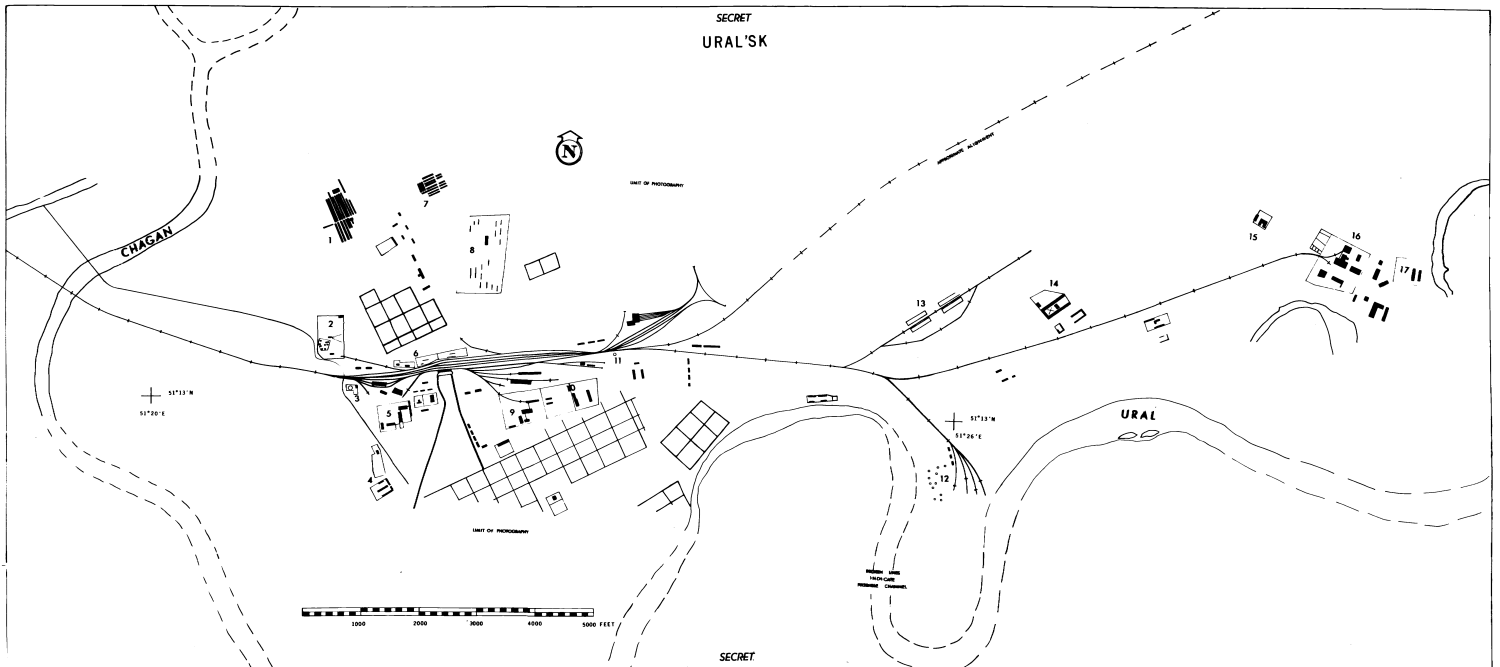

25X1D eastern terminus two warehouses, [REDACTED] and 330' x 30', are served by rail.

The smaller marshalling yard is approximately 1,000 feet long and 4 tracks wide, terminating in a reversing triangle. Five spur tracks lead to a roundhouse, [REDACTED] and an adjoining
